

B

Assay task		Choice required		Common wrong choice		Effect on answer
CUT&RUN spike-in	→	How to align spike-in reads	→	Used end-to-end alignment	→	Wrong spike-in normalization
WGBS methylation	→	How to count each CpG	→	Counted strand rows separately	→	Changed coverage and effect size
ATAC-seq peaks	→	What to give MACS3	→	Used paired-end BAM directly	→	Shifted peak and motif calls
Interpretation task	→	Which evidence to trust	→	Used literature mechanism	→	Overrode result from files
